

Citizens Observatories

The CITI-SENSE project and sensor platforms

IoT week, London

Session: Mobile citizen/personal sensors and crowd sourcing
Tuesday June 17th, 2014

Arne J. Berre,

arne.j.berre@sintef.no

Leonardo Santiago, Leonardo.SANTIAGO@ateknea.com

Program

- *Moderators: Arne J. Berre, SINTEF and Boris Pokrić, DunavNET*
- **11:30: Citizens Observatories - The CITI-SENSE project and sensor platforms**
- *Presenter: Arne Berre*
- *Organization: SINTEF*
- **11:45: COBWEB – Citizen Observatory WEB**
- *Presenter: Jamie Williams*
- *Organization: Environment Systems*
- **12:00: WeSenselt – Citizen Water Observatories**
- *Presenter: Suvodeep Mazumdar*
- *Organization: University of Sheffield*
- **12:15: CLIPS and IoT Lab – Public Administration and Crowdsourcing**
- *Presenter: Srdjan Krčo*
- *Organization: DunavNET*
- **12:30: MobiWallet – Personal Devices in Smart Transport**
- *Presenter: Boris Pokrić*
- *Organization: DunavNET*
- **12:45: Mobile sensors and Crowdsourcing – solutions and challenges**
- *Discussion with presenters and audience*

The five Citizen Observatory projects are funded by the EU as part of the topic ENV.2012.6.5-1 "Developing community based environmental monitoring and information systems using innovative and novel earth observation applications."

CITI-SENSE

- **Development of sensor-based Citizens' Observatory Community for improving quality of life in cities**
- **Citizens' observatories** – *communities that share technological solutions, information products and services and community participatory methods. Complementing established environmental data and information systems, improving local environmental decision making.*
- Nine cities (Barcelona, Belgrade, Edinburgh, Haifa, Ljubljana, Oslo, Ostrava, Vienna, Vitoria) use sensors to gather data on outdoor urban spaces and indoor school environments.

Basic data

Starting date: 01/10/2012

Duration: 48 months

Budget: 12M€

Partners: 28 partner organisations from Europe, Israel, South Korea and Australia

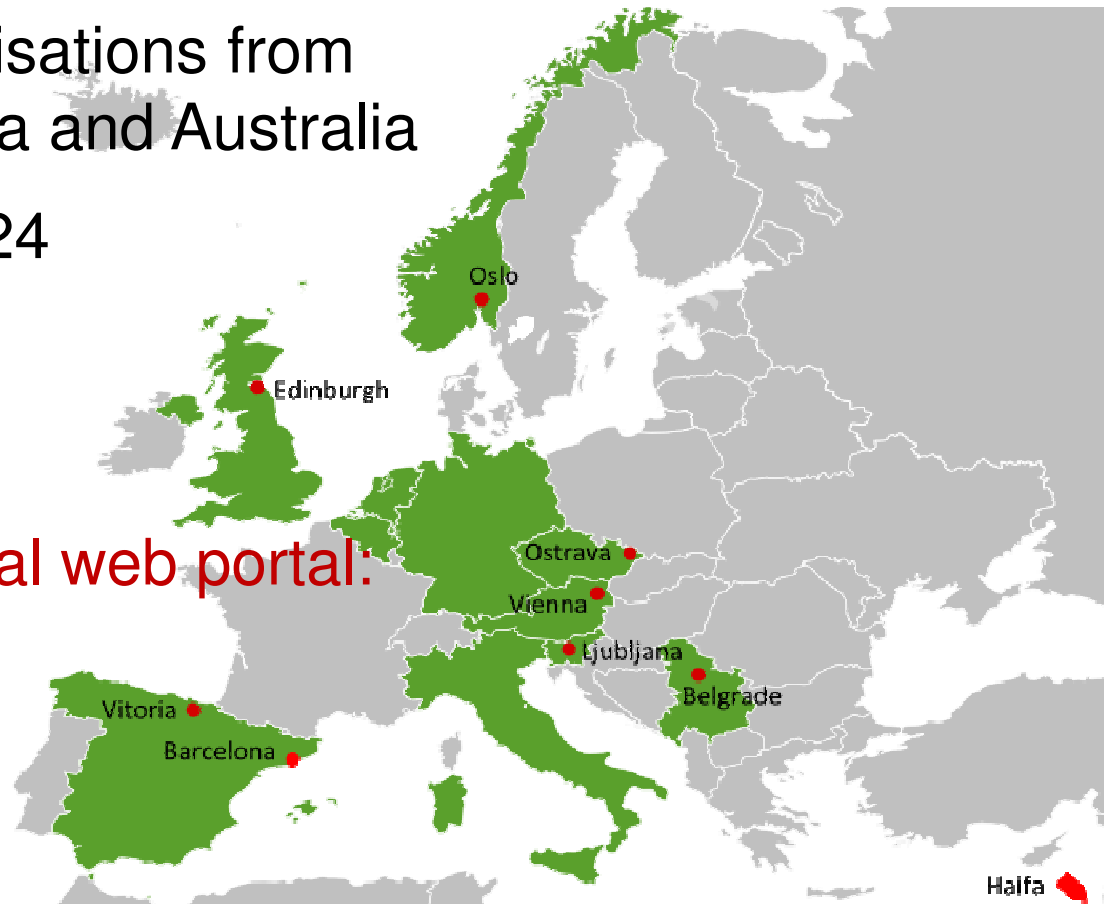

Grant agreement n°: 308524

Project web portal:

<http://www.citi-sense.eu>

Citizens' observatory central web portal:

<http://co.citi-sense.eu>

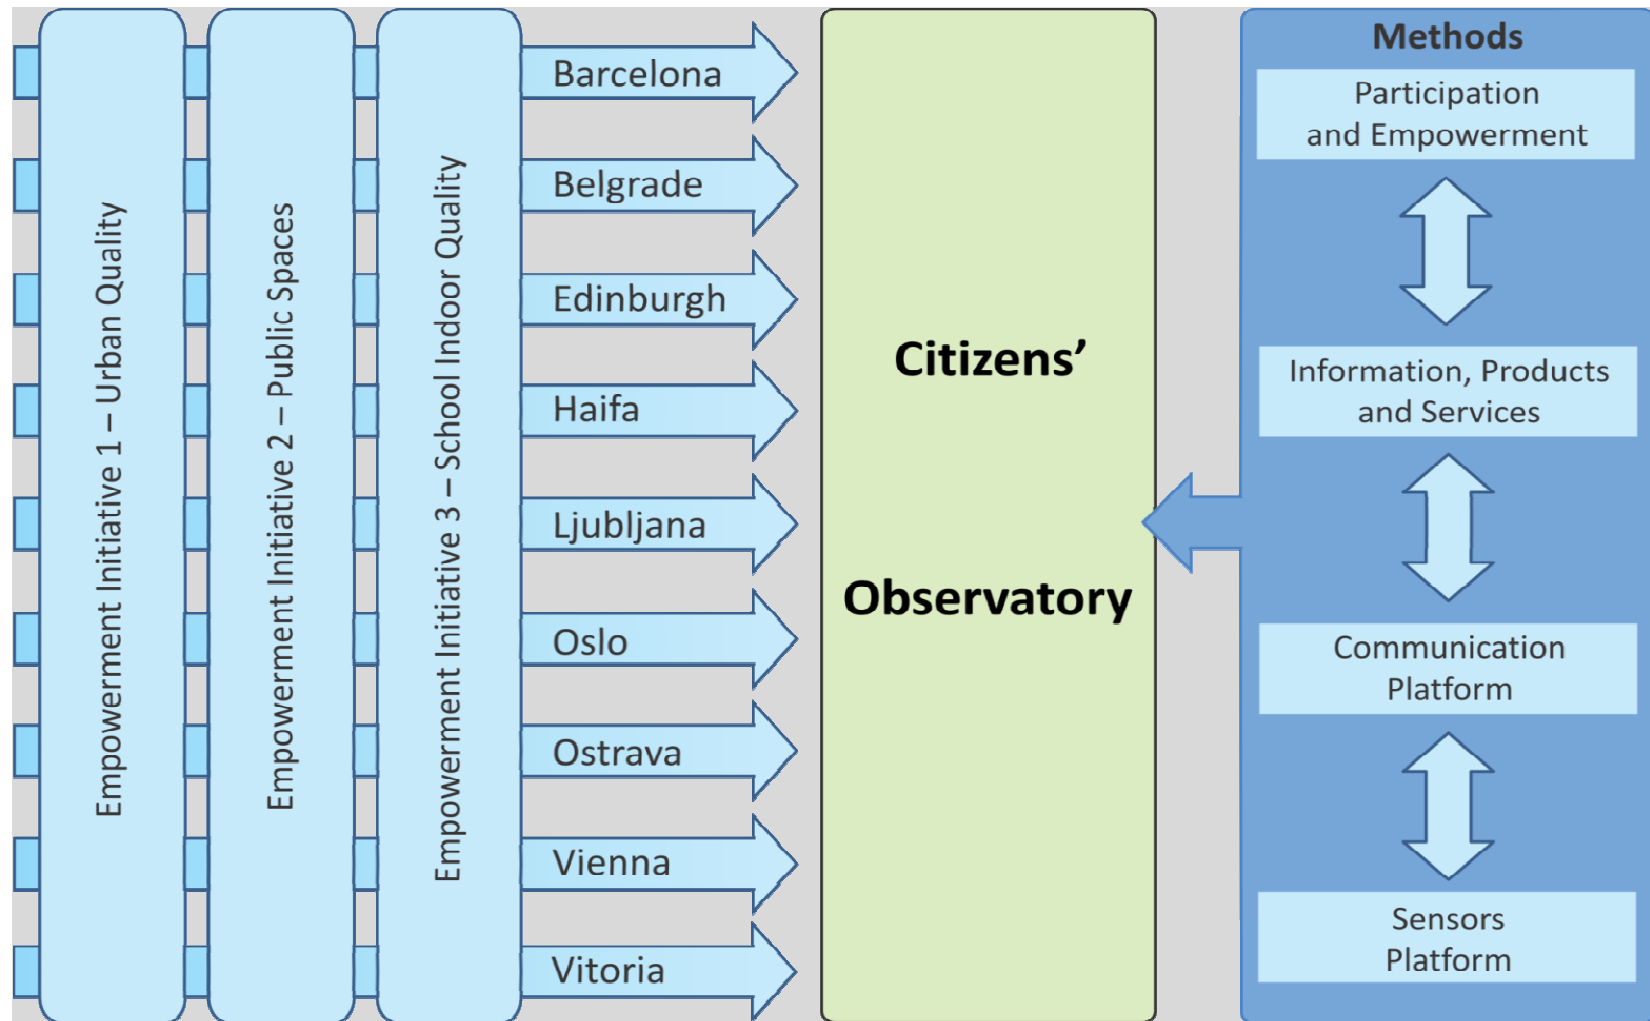

CITI-SENSE partners

Partners:

CITI-SENSE is a four year Collaborative Project partly funded by the EU FP7-ENV-2012 under grant agreement 308524, started in October 2012.

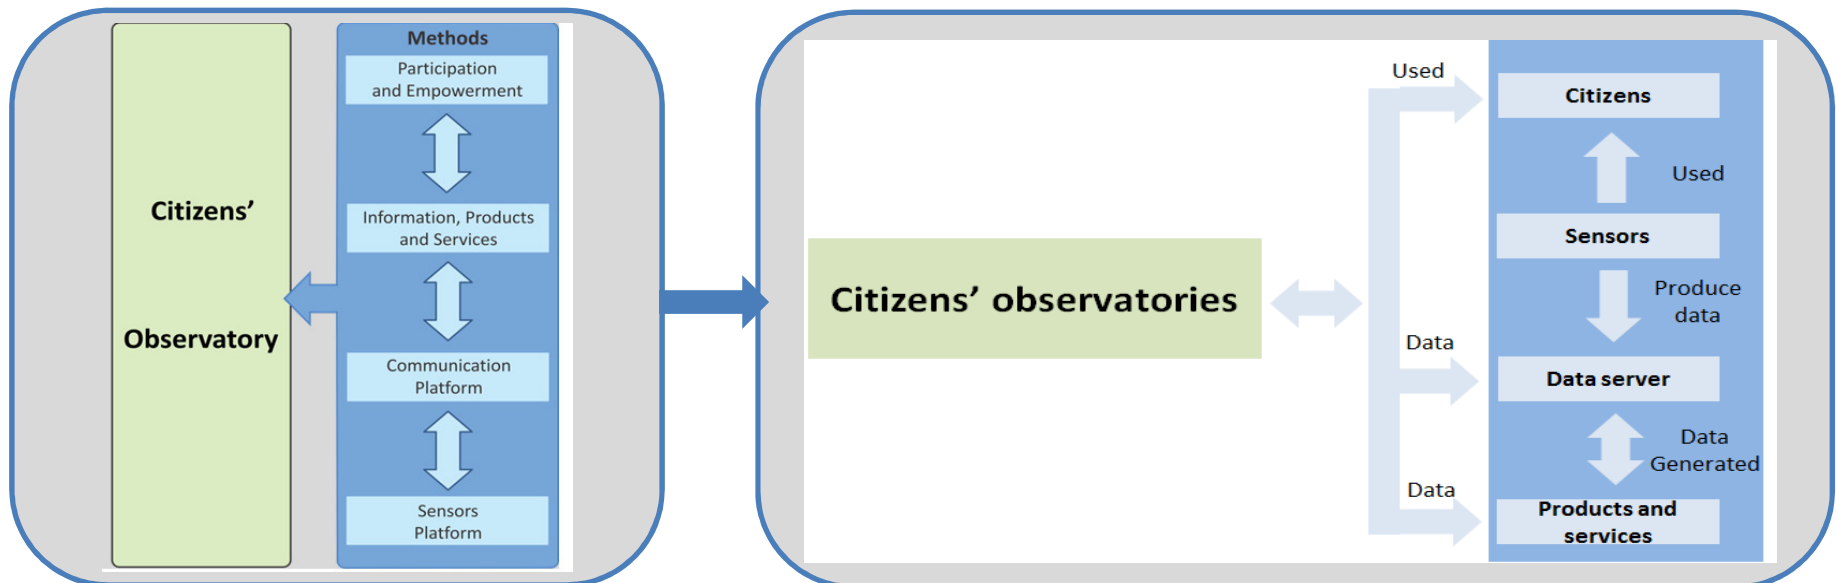

CITI-SENSE Citizens' Observatory

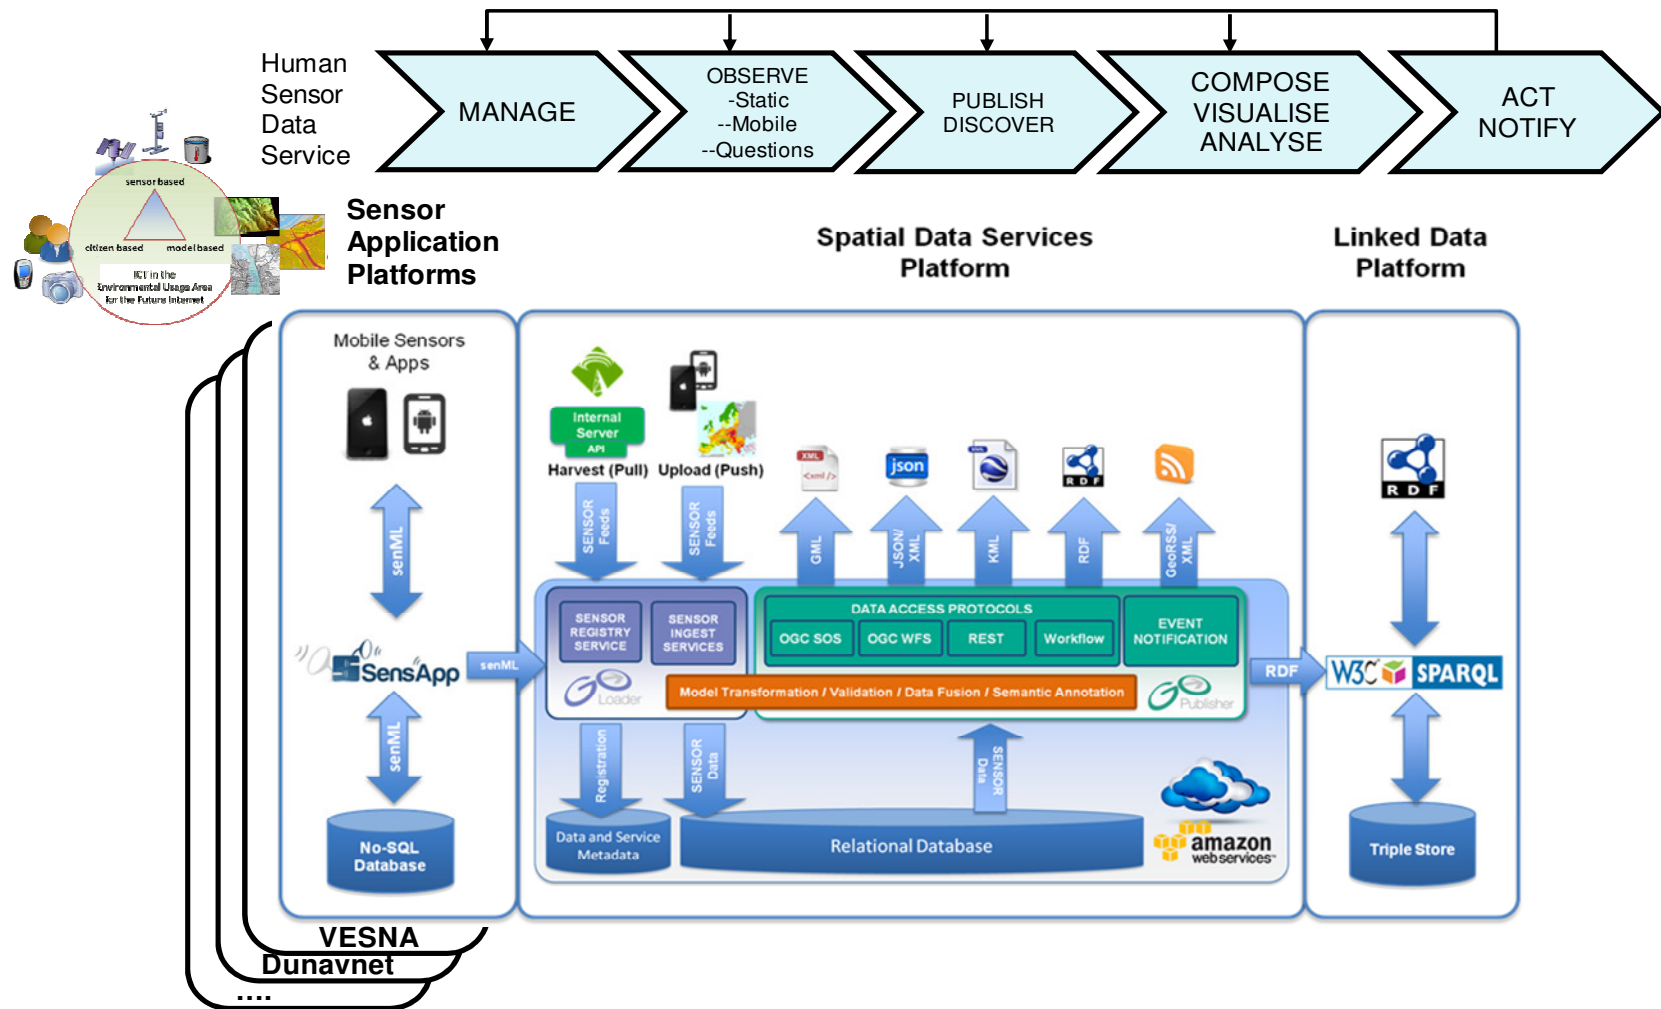

Citizens' Observatories Information Chain

– Four pillars of the COs information chain

- ❖ Citizens: citizens involvement in both monitoring through sensors and products and services using
- ❖ Sensors: technologies for distributed monitoring
- ❖ Data storage: information and communication technologies
- ❖ Services and products

Temperature and CO₂ in my classroom right now

The data are preliminary data and error may occur

View data from the sensors

Here you will find more detailed data from the sensor units located at our school.

[Read more...](#)

Facts

Indoor air quality greatly affects our health, well-being and performance. Here you will find useful information and practical advices about indoor air quality at the school. [Read more...](#)

Why do we measure?

Why do we measure indoor air quality and what can we use the measurements for?

[Read more...](#)

Campaigns and surveys

Here you can participate in on-going campaigns and view results from the campaigns. You may also establish new campaigns at you school. .

Create mobile/web questionnaires with CivicFlow

Go to www.civicflow.com and choose "CivicFlow or Social Login" or choose "Register" if you want or need to create a new account.

Registering as a user is uncomplicated and takes a minute or two.

If you choose "Social Login", you can log in with your Google, Twitter or Facebook account. This means CivicFlow will access your social profile information.

In the screenshot to the right, I choose to log in as a registered user.

Share - Collaborate - Communicate

The CITI-SENSE public portal is designed to enable citizens to not only have access to real-time environmental information provided by a wealth of sensors, including personal sensors, mobile sensors and static stations, but also to provide a forum for discussion, debate and sharing of YOUR own personal observations. Your contributions are important and the Citizens' Observatory is yours!

Your Voice

Let your voice be heard.

The GEOSS initiative enables the gathering of data on a wide spectrum of themes. For the CITI-SENSE project we supply data related to the Environment. This includes data on Noise, Air Quality, Thermal Comfort, UV Radiation, etc.

Our data will be made discoverable in the GEOSS portal. This portal is main entry point to Earth Observation data from all over the world.

Oslo Pilot
Last Updated by Mike on Dec 10, 2012

Indoor Air in Schools is the focus of this pilot study. One school in Oslo will be outfitted with Sensors in the classroom which will upload data on air quality, in real time, to our central server. This data will then be used to calculate the actual air quality levels in the classrooms.

CITI-SENSE | Personal Sensor Pack

ATEKNEA Sensor Pack in Pouch	
Total Weight (in pouch)	270 g approx.
Dimensions (in pouch)	85 x 135 x 60 mm (length x width x depth) The velcro strap adds 15 mm to the depth
Box Material	ABS
Pouch Material	Interior: cotton canvas fabric Exterior: polyester canvas fabric

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 308524

CITI-SENSE | Personal Sensor Pack

The Personal Sensor Pack developed by Ateknea is equipped with the following sensors:

- NO₂, O₃, CO (ppb)
- Temperature (°C) (Sensiron SHT75)
- Relative Humidity (%) (Sensiron SHT75)
- USB connectivity
- Bluetooth 2.0

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 308524

Personal Sensor Pack | Further Work

- Migrate from Bluetooth 2.0 to Bluetooth 4.0 (Bluetooth Smart)
- Migrate from Alphasense B4 sensors to more compact Alphasense A4 sensors.
- Integrate noise sensing (to be defined)
- Develop a smaller form factor for the sensor pack.

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 308524
